Surveyor:  
Maine (#881)*

**INTRODUCTION**

Mr. Goodeill is the Manager of Right of Way activities for SGC Engineering LLC. He has over forty years of experience in utility planning, design, construction, maintenance, and project management.

During his career Mr. Goodeill has dealt with every aspect of planning for and construction of small and large transmission and distribution pole-line and underground systems. He has preformed all aspects of work related to T&D construction management.

As a Licensed Professional Land Surveyor, he is able to assure a high level of accuracy to each project he is involved with.

Highlights of his career include acquisition of rights for the northern portion of the MEPCO 345 kV line in the 1960s, acquisition of rights for the proposed second 345 kV tie in eastern Maine in the 1980s, and in 2002-03 he negotiated rights for a 115 kV tie between Millinocket and Chester, Maine. Experience on these projects as well as the myriad of smaller 46 kV and numerous O&M jobs provides him with unique skills in addressing landowner issues before, during and after project construction.
