TECHNICAL SPECIALTIES

Dr. Will has over 16 years of experience encompassing:

- Business Management
- Large and Small Scale Archaeological Surveys
- Archaeological Site Data Recovery
- Cultural Resources Management Plans
- Native American Consultation
- Lithic and Faunal Analysis
- Report Writing and Editing
- Public Education

REPRESENTATIVE EXPERIENCE

Dr. Will has been a professional archaeologist since earning his Doctorate in Anthropology in 1985. Since then, he has been employed as a social science researcher in criminology and archaeology. Dr. Will is an Adjunct Professor of Quaternary Sciences at the University of Maine where he occasionally teaches classes and advises graduate students. In 1989, he founded a small business in 1989 to serve Maine companies with their cultural resources management needs as required by state law and Section 106 of the National Historic Preservation Act. The business grew at a steady rate and developed a national client base. Dr. Will had been the project director on numerous small and large-scale cultural resources management projects that have involved cost-effective and timely solutions to sometimes-complex issues ranging from survey design to Native American consultation. In addition, he continues to publish on his work in professional journals, maintain an active public speaking agenda, and serve on the boards of directors of several organizations involved with the humanities and historic preservation. Currently, Dr. Will is Operations Manager for the TRC Northeast sector of cultural resources management.

Business Management

Founded and Served as CEO and CFO for Archaeological Research Consultants, Inc., Ellsworth, Maine. Archaeological Research Consultants, Inc. was incorporated as a small business in 1989 to provide cultural resources management consulting to the business community. It additionally competed for and won grants to undertake scientific research and publication in archaeology. Its client base grew from a few local businesses to include Bangor Hydro, Bowater International, Central Maine Power,

Florida Power and Light, International Paper, and Pennsylvania Power and Light to name but a few. TRC acquired Archaeological Research Consultants in 2003.

Large and Small Scale Archaeological Surveys

Dr. Will has served as Principal Investigator on more than 80 large and small scale surveys for archaeological sites along natural gas pipelines, electrical transmission lines, federal relicensing of hydroelectric projects, and other commercial development projects.

Cultural Resources Management Studies of the Maine Portion of the Maritimes & Northeast Natural Gas Pipeline Project. This project was completed for Maritimes and Northeast, LLC between 1997-2002 and involved archaeological sampling and survey of approximately 350 miles of natural gas pipeline corridor beginning at the St Croix River (Maine Canadian boundary) and ending at the Piscataqua River (Maine-New Hampshire boundary). More than 40 personnel were involved in this multiyear project, which completed on time.

Cultural Resources Management Studies for the Federal Licensing of the Moosehead Lake Outlet Dams (FERC no. 2671) 1992-2002. This multi-year project was initiated for Central Maine Power Company and is being completed for FPLE Maine Hydro. It began in 1992 with survey of more than 200 prehistoric archaeological sites along 350 miles of shoreline. Additional fieldwork has involved data recovery on eight sites eligible for listing in the National Register of Historic Places, work that will continue into the 2004 field season.

Cultural Resource Management Studies of the Eastern Surplus Company Superfund Site. 1999-2000. This project was begun for the U.S. Environmental Protection Agency under a contract to TetraTech NUS. It involved meeting a tight time frame and consultation with the Passamaquoddy Tribe. Dr Will completed the Phase I and Phase II studies on time and with the support and blessing of the Passamaquoddy Tribe.

Archaeological Site Data Recovery

Dr. Will has been principal investigator on more than a dozen large-scale data recovery projects involving more than 700 square meters of excavation, analysis, and reporting. Many of these data recovery studies have been the basis of research articles in a variety of professional journals.

Phase III Study of the Clark I Site. This data recovery project was completed in 2000 for FPLE Maine Hydro under a contract originally awarded by Central Maine Power Company. Excavation in river alluvium in Norridgewock, Maine proceeded to more than 1.5 meters below the ground surface and yielded a sequence of human occupations spanning 6,000 years. Results of this study were published in the *Archaeology of Eastern North America* in 2002.

Phase III Study of the Chan Site. This project was completed for the Maine Public Service Company in Caribou, Maine. The site yielded a variety of data from a geographic area of Maine that is not well known. A report of the project was published in the *Bulletin of the Maine Archaeological Society* in 1997.

Phase III Study of the Bombazee West Site. This project was completed for FPLE Maine Hydro in 2000 and involved excavation of a Woodland Period site to a depth of 2.0 meters along the Kennebec River in Norridgewock, Maine. A report of the project was published in the *Bulletin of the Maine Archaeological Society* in 2001.

Cultural Resources Management (HPMP) Plans

Dr. Will has written cultural resources management plans (CRMPs) as required under Section 106 of the National Historic Preservation Act (1966) for a number of clients. These plans have been reviewed and approved by State Historic Preservation Officers, the Advisory Council on Historic Preservation, the Federal Energy Regulatory Commission and the Department of Defense.

Cultural Resources Management Plans for the Ripogenus and Penobscot Mills Projects. The CRMPs for these northern Maine, federally licensed dams were prepared in 1999 for Bowater International and are now being implemented by Great Lakes Hydro, the current owners of the projects. The plans involve archaeological site investigations phased in over a 7-year period and public education initiatives.

Cultural Resources Management Plans for the Milford, Stillwater and Veazie Projects. The CRMPs for these central Maine, federally licensed dams were prepared in 1999 for PPL Maine. The Plans call for data recovery and interpretation of findings at several large and important prehistoric Native American sites and also include public education initiatives.

Cultural Resources Management Plans for the Maine Army National Guard. The CRMP for the Maine Army National Guard was completed in 2002 to provide a model for managing known and anticipated cultural resources in the Guard's training facilities, which are located around the state of Maine.

Native American Consultation

Dr. Will has worked with leaders of the Penobscot Indian Nation and the Passamaquoddy Tribe since 1998 and has earned their trust as an honest and reliable negotiator. He has worked with these Native American tribes to negotiate cultural resources management plans on behalf of the U.S. Environmental Protection Agency, the Maine Army National Guard, and PPL Maine. Currently, he serves as consulting archaeologist to the Passamaquoddy Tribal Historic Preservation Officer. He has also worked on Section 106 consultation with leaders of the Seneca and Tuscarora Indian Nations in western New York.

Lithic and Faunal Analysis

Dr. Will has advanced graduate training in the identification and analysis of prehistoric Native American stone and bone artifacts as well as food bone remains recovered from archaeological sites. He has conducted studies on these materials from sites in Maine, Montana, and the High Arctic. His research has been published in *American Antiquity*, *Archaeology of Eastern North American*, *Lithic Technology*, *Northeast Anthropologist*, and *Zooarchaeological Research News*, to name but a few.

Report Writing and Editing

Dr. Will is the author or co-author of more than 80 archaeological reports ranging in length from a few dozen pages to more than 450 pages. He has co-authored a book on dinosaurs and has also written and published on criminal justice issues, such as alternative sanctioning for non-violent offenders and AIDs in prison. Dr. Will served as Associate Editor (1986-1994) for *Crime and Justice*, and internationally acclaimed book series published by the University of Chicago Press and currently serves as Editor for the *Maine Archaeological Society Newsletter*.

Public Education

Dr. Will has been actively involved in public education for more than a decade. He serves as an Adjunct Professor of Quaternary Studies at the University of Maine where he advises graduate students and teaches courses in archaeology. Additionally, he teaches adult education courses, speaks in the public

school system, and frequently is asked to lectures on archaeology to historic societies and civic organizations. One of his major accomplishments is the production of archaeological curriculum materials that are now in use in more than 50 Maine schools and libraries.
